

# ENSOL FUEL TANKS

Quality Engineered in High-Strength Aluminium

A TANK FOR LIFE

# Ensol is your superior, longer lasting fuel storage solution

Every single Ensol tank is innovatively designed and engineered with high-strength marine grade aluminium. Ensol tanks are made in New Zealand for our extreme coastal and climatic conditions.

## ENSOL EXCELLENCE

Ensol engineers specify 4mm marine grade aluminium in all Ensol tanks, with high frequency welding for a superb finish and durability. Stainless steel is used for all bolts and valves, with aluminium for tank legs, bracing and ladders – there's simply nothing to rust.

EPA • HSNO

CERTIFIED

**It's the only fuel tank  
you'll ever need.**

**Ensol is locally  
owned and operated.  
All our tanks are  
innovated, designed  
and constructed in  
New Zealand.**

**On-ground tank  
with containment bund**

**Utility tank**

**Above-ground tank**

**On-ground tank**

**Trailer tank (single axle)**

# Ensol tanks are specifically engineered for every purpose

## ABOVE-GROUND TANKS — gravity fed with optional containment bund

Single compartment models: 700 litre, 900 litre, 1100 litre, 1600 litre, 1900 litre.

Twins compartment tank splits: 50/50, 60/40, 70/30.

Includes mountings for fuel nozzle and delivery docket holder, and items such as an inline fuel filter and flow meter, where fitted.

## ON-GROUND TANKS — with pumps and optional containment bund

Single compartment models: 700 litre, 900 litre, 1100 litre, 1600 litre, 1900 litre.

Twins compartment tank splits: 50/50, 60/40, 70/30.

Can be fitted with your choice of K3 hand pumps, electric or stand-alone motorised pumps.

## TRAILER TANKS

Capacities: 1100 litre, 1900 litre.

Ensol-quality fully galvanized frame and includes a jockey wheel and rear stabilising leg, lights and rollover pressure vent, lockable fill cover and pump/tool box cover. Available as single axle braked or unbraked, or dual axle with brakes. Optional pumps include K3, K5, 12 or 24 volt and motorised Honda pumps.

## CONTRACTOR UTILITY TANKS

Specifically engineered tank for mounting on either pickup or flat-deck utility trucks.

Capacities: 250 litre, 450 litre.

Options include a 12 or 24 volt pump, 5 metre hose and nozzle and a fitted lockable coverbox.

A TANK FOR LIFE

## ACCESSORIES

Ensol carries a full range of high quality parts and equipment for farm fuel tanks; pumps range from hand and 12 and 24 volt models, to motorised Honda pumps. Ensol also offers a full range of hoses, filters, valves, meters and fuel nozzles.

## LEASING & PURCHASING OPTIONS

Ensol tanks are surprisingly cost effective. Tax efficient leasing or outright purchase means you can have fuel storage that's fully compliant and extremely durable.

**Choosing an Ensol tank is the best decision you'll make.**

1. **Leasing option – pay a small, tax deductible monthly amount and have the Ensol tank you want.**
2. **Purchase outright.**

Call us to discuss the best plan for you, or visit our website for more information.

## **CUSTOMISE YOUR ENSOL TANK**

Ensol can build a tank to your exact requirements. Plus there's a full range of accessories to meet your specific needs; including top quality pumps, fittings and nozzles.

## **ENGINEERED FOR SAFETY**

Ensol tanks are engineered to meet Dangerous Goods and HSNO requirements and carry an EPA Manufacturer's certificate. All tanks have lockable filling points for safety and security.

All Ensol static tanks are available with containment bunds in either painted or galvanised mild steel, or our 4mm marine grade aluminium.
